Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 6, 8-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Murade (6297862). See figure 6, top layer 14 for the upper light shielding layer. Note that this layer is mislabeled, it should have been labeled as 7.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 7-9 (with respect to claim 1) rejected under 35 U.S.C. 103(a) as being unpatentable over Rho et al. (6057896). Rho discloses a TFT (20, 50, 60, 71, 72) an upper shielding layer (110). Lacking is the lower shielding layer. However, forming the gate electrode 20 from a light shielding material such as aluminum was common knowledge in order to prevent the TFT from degrading due to light. Furthermore the examiner is taking official notice of that fact. Accordingly it would have been obvious to one of ordinary skill.

Note that claims 8-9 are product by process limitations and are given limited patentable weight. See MPEP 2100.

Allowable Subject Matter

Claims 2-5 and 10-25 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Response to Arguments

Applicant's arguments filed 6/5/02 have been fully considered but they are not persuasive. Black mask 14 anticipates the limitation "disposed opposite to and protruding toward a gate electrode". Gate electrodes 2 lay beneath the mask 14 and the mask 14 protrudes downwards. Hence, mask 14 protrudes towards gate electrodes 2.

Regarding the Rho reference, first the mask is not flat and it is disposed opposite the gate electrode 20. The mask is directly above and aligned with gate electrode, hence it is opposite the gate electrode. Because Rho discloses intervening layers between the mask and gate does not preclude the mask from being opposite the gate.
